Ascent Healthcare Solutions

10232 S. 51st Street
Phoenix, AZ 85044
Tel. 888.888.3433 | Fax. 480.763.5320
www.ascents.com

Environmental Vision Statement

Ascent Healthcare Solutions is the leading independent reprocessor of medical devices for top hospitals and

healthcare providers throughout North America. Ascent customers have safely reprocessed in excess of 50 million medical devices, eliminating in excess of 50 million medical devices, eliminating in excess of 10,000 tons from local landfills, and saving over \$500 million from their costs by reprocessing and recycling medical products they would otherwise have needlessly thrown away.

B. Braun Medical

824 Twelfth Avenue
Bethlehem, PA 18018
Tel. 610.997.4259 | Fax. 610.691.6249
www.bbraunusa.com

Environmental Vision Statement

B. Braun Medical is the only full-line manufacturer of IV solutions in PVC-free, DEHP-free containers and was one of the first corporations to recommend minimizing their use in medical products. EXCEL® PVC-free, DEHP-free large volume IV containers weigh 28-48% less than comparable PVC containers. When PVC containers are incinerated, they release up to 30 times more hydrogen chloride gas into the atmosphere than EXCEL containers do upon incineration. B. Braun Medical Inc. provides a broad array of products that give customers an environmentally-friendly alternative to meet their healthcare needs.

Products to be Displayed

PAB, EXCEL, and DUPLEX. All are DEHP-free, PVC-free, and Latex-free.

BD

4665 North Avenue
Oceanside, CA 92056
Tel. 760.631.6526 | Fax. 760.631.5324
www.bd.com

Environmental Vision Statement

BD is a medical technology company that serves healthcare institutions, life science researchers, clinical laboratories, industry and the general public. BD manufactures and sells a broad range of medical supplies, devices, laboratory equipment and diagnostic products.

www.consorta.com

About Consorta, Inc.

Consorta, based in suburban Chicago, is a leading healthcare resource management and group purchasing organization whose shareholders are faith-based or non-profit health systems. Consorta's 12 shareholder healthcare systems represent 60 percent of all Catholic hospitals in the United States, and are among the leading integrators of non-profit healthcare in America. Consorta's membership now encompasses more than 2,400 care sites, includes more than 500 acute and over 300 extended care facilities throughout the country. Consorta also provides contract purchasing power for some of the nation's leading non-profit organizations. For more information, visit www.consorta.com.

About EverGreen Magazine

EverGreen is the authoritative voice on environmentally preferred purchasing for healthcare products and services. And, it is the only publication in the marketplace that combines this focus with supply chain solutions designed to improve quality, efficiency and patient safety. EverGreen magazine is an important resource to the healthcare industry for information and news regarding environmentally preferred purchasing that can positively affect the health of patients, employees and the communities they live in and serve. Not only is EverGreen the first and only healthcare industry magazine focused on green procurement and sustainable environmental practices, but the publication has a qualified subscriber base of more than 50,000* healthcare executives and supply chain management decision makers, making it the third largest publication in the field. For details, please visit www.evergreen-magazine.com.

Cooler Smart

77 McCullough Drive, Suite 9
New Castle, DE, 19720
Tel. 302.323.2100 ext. 1107 | Fax. 302.323.1900
www.coolersmart.com

Environmental Vision Statement

Cooler Smart reduces the environmental impact of businesses by lowering energy consumption and greenhouse gas emissions associated with the delivery of bottled water. Eliminating the need for bottle manufacturing, delivery and storage, CoolerSmart delivers fresh clean water and typically at a lower cost to business.

Dornoch Medical Systems Inc.

4032 NW Riverside Drive
Riverside, MO, 64150
Tel. 888.466.6633 | Fax. 816.505.1050
www.dornoch.com

Environmental Vision Statement

Suction canisters generate between 50 to 70 percent of an operating room's infectious waste volume and weight. The Transposal system's innovative on-site fluid disposal technology uses the only reusable suction canister system in the marketplace to eliminate 90 percent of this waste volume, weight, and cost. In addition, the system eliminates the need for expensive treatment additives and other costs associated with liquid waste handling and disposal.

Products To Be Displayed

Transposal line of products which includes the innovative reusable canister system and ultra high fluid system.

Ecoglove Ltd.

3705 Bank of America Tower 12, Harcourt Road
Central, Hong Kong
Tel. +33.67.8563138 | Fax. +33.13.4648366
www.ecoglove.com

Environmental Vision Statement

EcoGlove's mission is to make a rapid and directly quantifiable impact on the enormous amounts of landfill waste and energy consumption associated with disposable glove use. The users of its service benefit from total

elimination of disposed waste, a carbon footprint reduction of 60% or more and a 75% saving in glove imports and transportation. This is achieved with no increase in costs and with glove quality and safety dramatically improved.

Products To Be Displayed

EcoGlove replaces conventional 'box moving' exam glove supply with a turnkey solution that delivers gloves to exactly match individual user requirements as well collecting them after use. It is based on a range of Tr@ce™ gloves, specifically designed to be reusable, and a Glove Reprocessing Unit, GRU, that reconditions them to be as new and contaminant free. Tr@ce™ gloves are available in Nitrile.

Totally latex free, this formulation is also exceptionally clean from chemical causing type IV allergy and design to make a high quality reusable glove. Tr@ce™ gloves are also individually coded to be uniquely identifiable, which is essential for GRU processing but also provides traceability and usage statistics never before available.

The GRU is a fully automated, enclosed system that inspects the glove and takes it through its various cleaning, pinhole testing and decontamination stages. Gloves that do not pass stringent final quality tests are shredded as clean waste and recycled. The GRU is operated by local service partners, either as dedicated system for high volume users or shared between a number lower volume users.

Users benefit from better, safer quality, reduced cost, no waste, and reduced carbon footprint.

Erzen Associates Inc.

1500 McCully Rd
Monroeville, PA 15146
Tel. 800.773.7963
Fax. 412.373.4120

REDEMTECH

4115 Leap Road
Columbus, OH 43026
Tel. 800.743.3499 | Fax. 614.850.3354
www.redemtech.com

Environmental Vision Statement

Redemtech's environmental vision is founded on the basic principle of "reduce, reuse and (lastly) recycle." We believe sustainable computing isn't just good for the environment, but good for business; a proactive approach which will drive efficiencies in IT procurement and management that have a significant economic return while simultaneously reducing technology's impact on the environment. This approach focuses first on reducing waste through more efficient use of IT assets and extends to end-of-life management to ensure disposed assets are not contributing to global pollution.

Products to be Displayed

LRedemtech Technology Change Management (TCM) services recover, refurbish, redeploy, resell and recycle IT assets of every kind with complete security, accountability and compliance with HIPAA and RCRA regulations.

Redemtech's Assured Recycling is the global standard in environmentally responsible recycling, regulatory compliance and client indemnification. Through our Environmental Management System (EMS) we have established the highest standards in the industry, which meet or exceed all important international requirements and regulatory obligations for e-waste accountability. Just as important, we hold our downstream partners to the same high standards for e-waste handling including: zero landfill, zero incineration, zero prison labor and zero export of non-working product to developing countries.

Redemtech's Warranted Data Security is the industry's most robust solution, delivering 100% effective hard drive erasure, auditable reliability, certified reporting and security repository to conclude the information management lifecycle. Customers may choose from a variety of data erasure options, according to the sensitivity of their data. Our security solution also includes strict chain-of-custody procedures and patent-pending Datasure Lock-IT™ technology that enables healthcare organizations to store and transport data-bearing assets with unprecedented security and accountability.

San-I-Pak, Inc.

Environmental Vision Statement

The inception of San-I-Pak in 1978 was founded upon principles that 1) protect the environment and 2) safeguard communities. As a clean and green alternative to medical waste incinerators, San-I-Pak has been the technology of choice by an overwhelming majority of healthcare facilities that treat medical waste on-site. By sterilizing infectious waste on-site, healthcare institutions are responsibly safeguarding local communities by NOT transporting this hazardous waste through public streets. Today's threats warrant responsible infection control practices by healthcare institutions.

Trinova Medical Waste Solutions

2690 E. Cedar Street
Ontario, CA 91761
Tel. 909.226.0195 | Fax. 909.972.1655
www.triovamed.com

Environmental Vision Statement

To be the premier service partner for providing the "cleanest and greenest" mobile and onsite medical waste treatment processing technology available. Our goal is to work seamlessly with hospital leadership to integrate aggressive waste reduction and recycling strategies and methods in conjunction with, solid and medical waste streams to significantly reduce the natural resources used and pollution created by transporting waste for treatment to render it non-infectious and the related onsite heat treatment technologies. Additionally, our HIPPA system is designed to increasing the "simplicity" for compliance with HIPPA destruction management.

Products to be Displayed:

Replacement technology for autoclaves and offsite treatment of medical waste. Trinova provides mobile and onsite medical waste treatment technology that pre-shreds waste and submerges it in an aqueous chlorine dioxide solution that provides unmatched efficacy, low energy and natural resource consumption, one-touch safe handling, reduction of waste volume by as much as 80%, and processing capabilities up to 1,500 pounds per hour. Installations include waste stream analysis, community based recycling programs (to aggressively institute or jump start recycling programs), and customer tailored waste stream management consulting.

TSO3 Inc.

2505 Avenue Dalton
Quebec, QC, G1P 355, Canada
Tel. 418 651.0003 | Fax. 866.651.8763
www.tso3.com

Environmental Vision Statement

TSO3's philosophy is centered on fulfilling our responsibilities toward society and the environment. Our customers seek ways to reduce their environmental footprint while enhancing their quality of care. Our sterilization products are as economically advantageous as they are ecologically sound. We offer total cost of ownership advantage, increase clinical efficacy and improve the environmental performance of sterilization in the health care sector.

Products to be Displayed

The TSO3 125L Ozone Sterilizer is a low-temperature, high-capacity, general purpose sterilizer designed for medical facilities. Our fast, economical and environmentally friendly technology can help you control your costs and maintain a low inventory of medical devices. It is possible that your CSD is spending up to \$120 or more for what can be done in the 125L Ozone Sterilizer for about \$4.

Vernacare Inc.

150 Norfinch Drive #1
Toronto, ON M3N 1X5, Canada
Tel. 416.661.5552 | Fax. 416.661.5559
www.vernacare.com

Environmental Vision Statement

Creating new uses for recycled newspapers, Vernacare is the world's leading pioneer in the design of biodegradable patient bedside products (bedpans, urinals, kidney basins) that are used extensively throughout Europe and the world, and now more frequently in the United States. Our innovative method of waste disposal, safely and efficiently disposes of our bedside products into the municipal sewer system thereby reducing the amount of disposable plastics flowing into landfills. Vernacare's 50 years commitment to recycling and innovation demonstrates its longstanding commitment to good ecological product stewardship.
